WIRESHARK INSTALLATION

Wireshark is a powerful network protocol analyser that captures and inspects data packets traveling over a network in real time. It is used by network administrators, security analysts, and developers to troubleshoot, monitor, and analyse network issues.

How Wireshark works:
Wireshark listens to network traffic on the selected network interface. It captures each data packet passing through. Captured packets are decoded and displayed for inspection. Filters and tools allow detailed analysis, such as following a TCP stream or analysing latency.

Installing Wireshark on Windows:

Follow the below steps to install Wireshark on Windows:

Step 1: Visit the https://www.wireshark.org/download.html using any web browser.

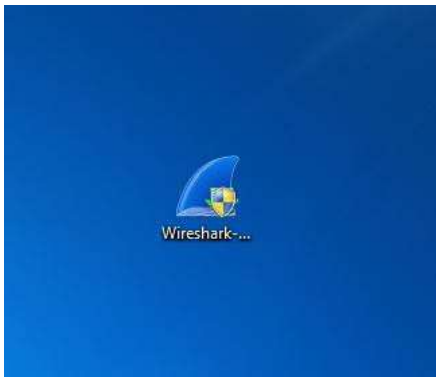

Step 2: Click on Download, a new webpage will open with different installers of Wireshark.

Step 3: Downloading of the executable file will start shortly. It is a small 73.69 MB file that will take some time.

Step 4: Now check for the executable file in downloads in your system and run it.

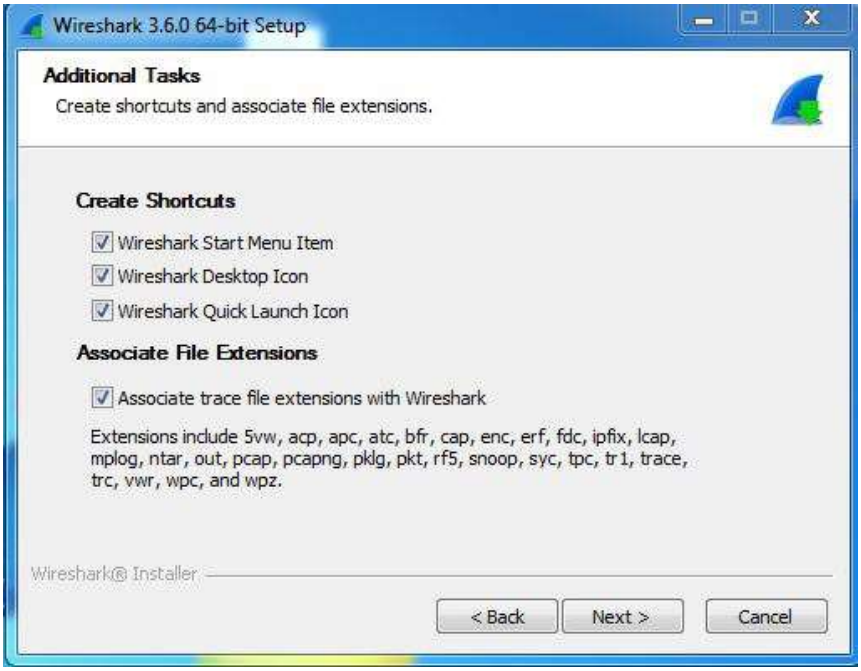

Step 5: It will prompt confirmation to make changes to your system. Click on Yes.

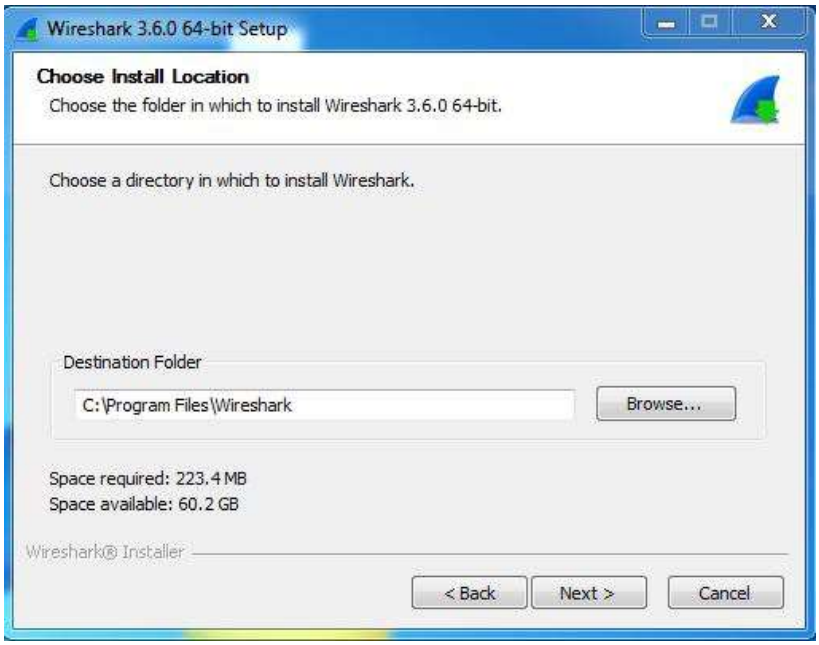

Step 6: Setup screen will appear, click on Next.

Step 7: The next screen will be of License Agreement, click on Noted.

Step 8: This screen is of choosing shortcuts like start menu or desktop icon along with file extensions which can be intercepted by Wireshark, tick all boxes and click on Next button.

Step 9: The next screen will be of installing location so choose the drive which will have sufficient memory space for installation. It needed only a memory space of 223.4 MB.

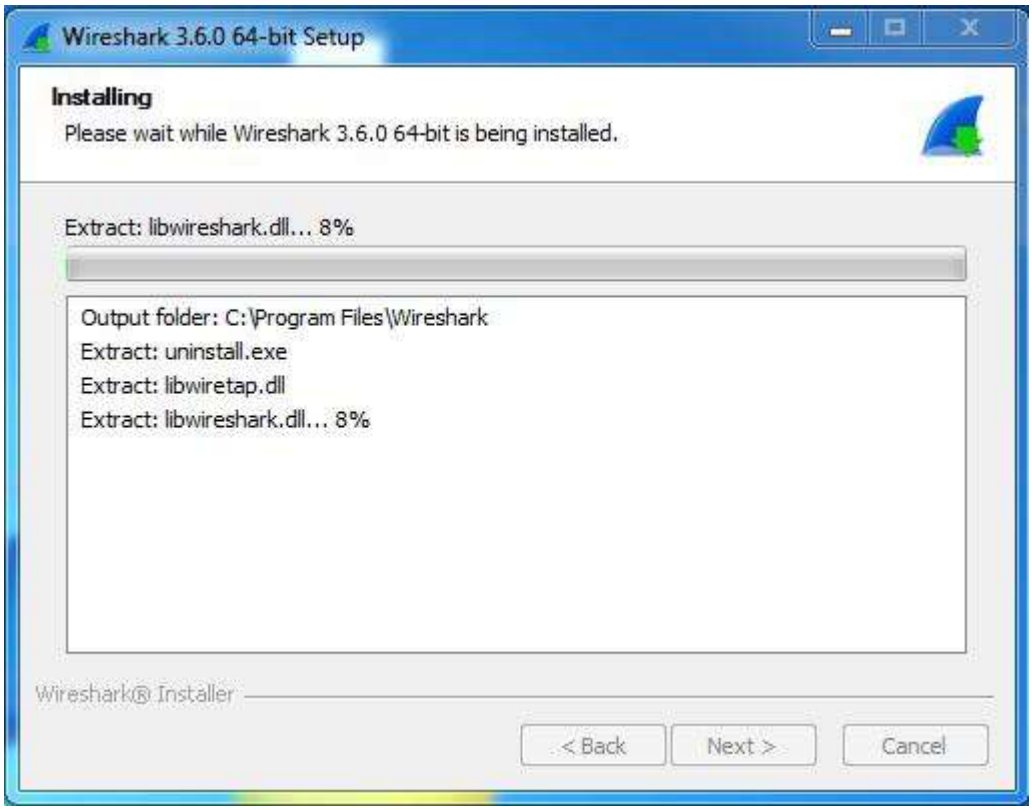

Step 10: Next screen has an option to install Npcap which is used with Wireshark to capture packets *pcap* means packet capture so the install option is already checked don't change anything and click the next button.

Step 11: Next screen is about USB network capturing so it is one's choice to use it or not, click on Install.

Step 12: After this installation process will start.

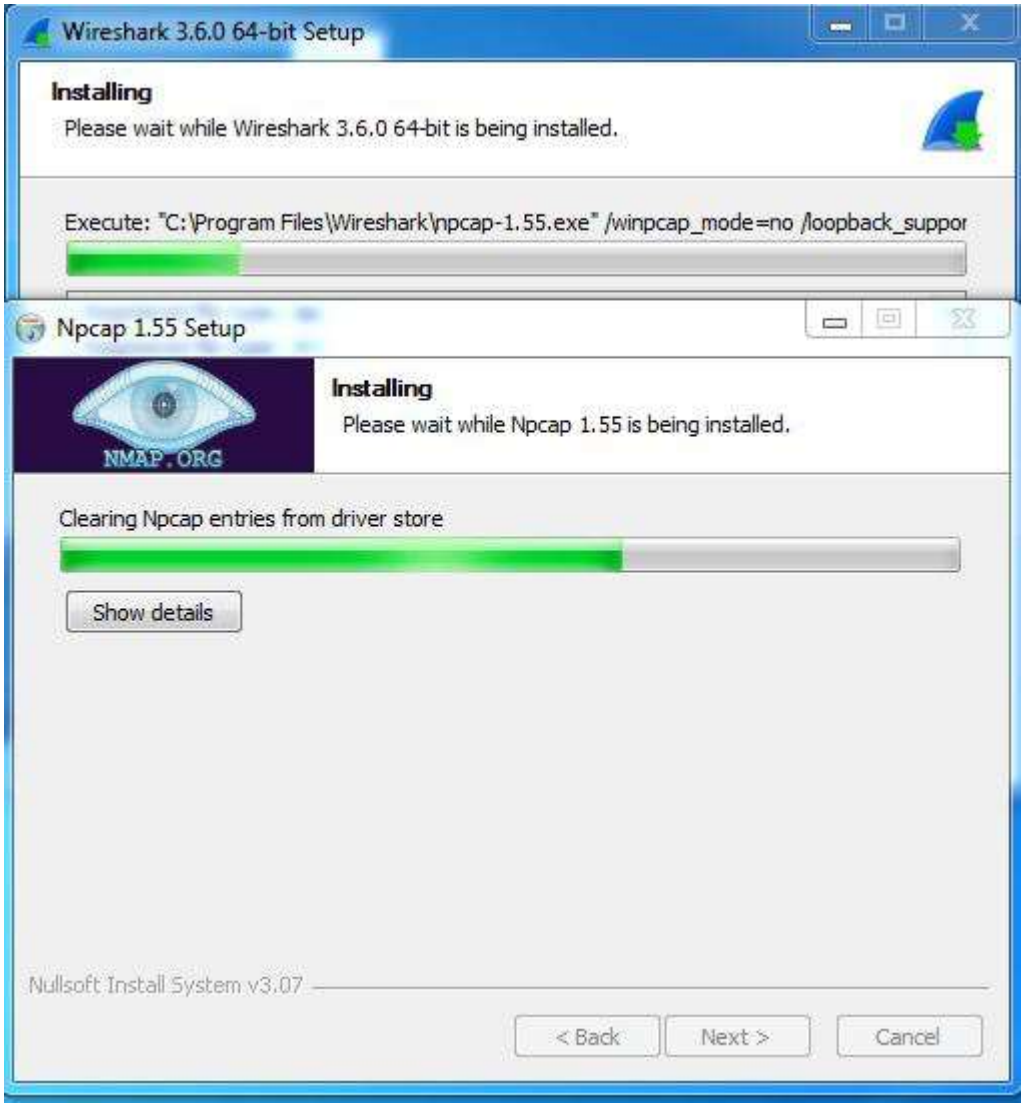

Step 13: This installation will prompt for Npcap installation as already checked so the license agreement of Npcap will appear to click on the *I Agree* button.

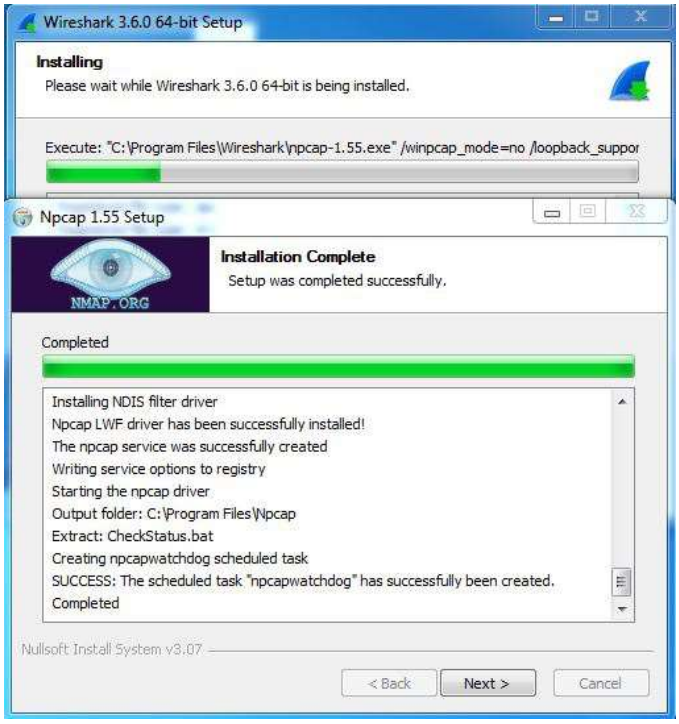

Step 14: Next screen is about different installing options of *npcap*, don't do anything click on Install.

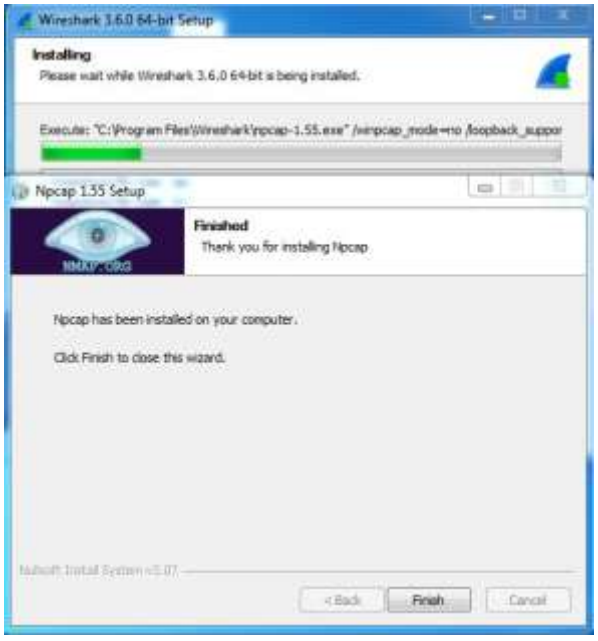

Step 15: After this installation process will start which will take only a minute.

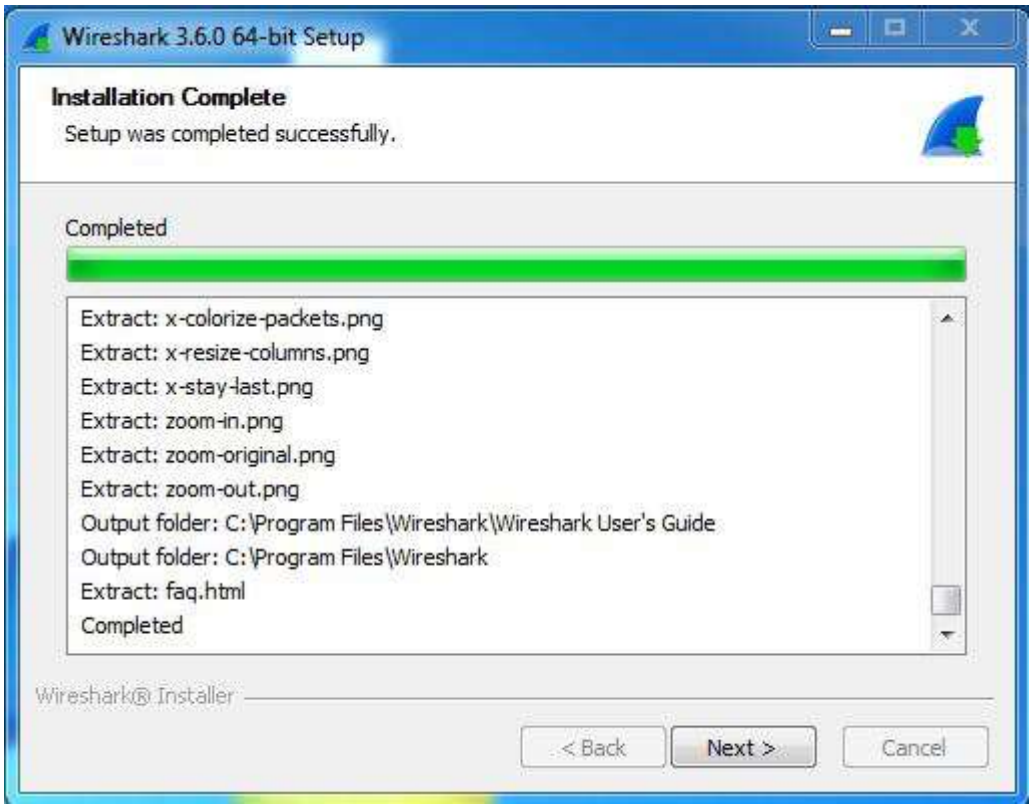

Step 16: After this installation process will complete click on the Next button.

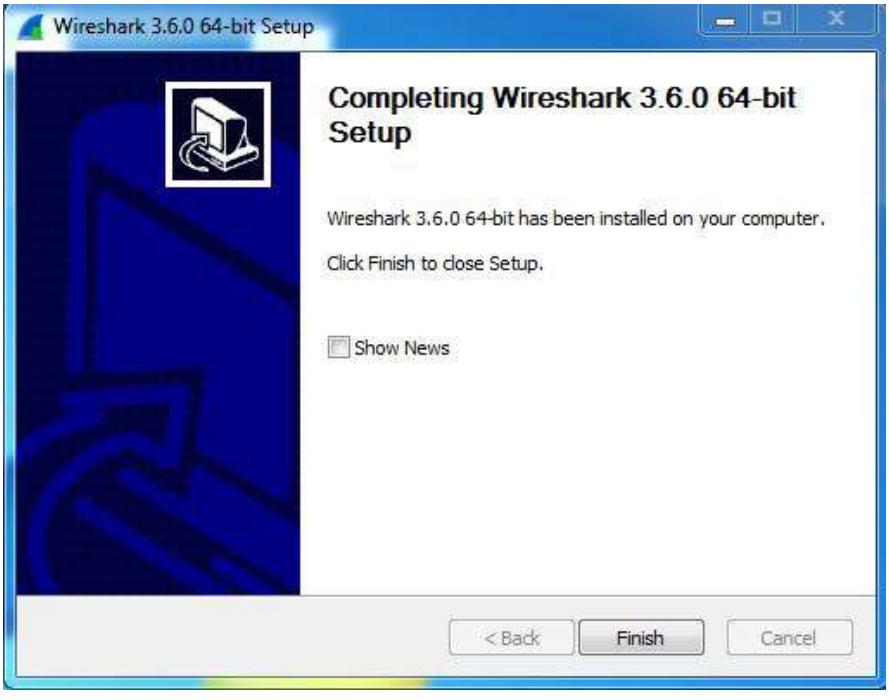

Step 17: Click on Finish after the installation process is complete.

Step 18: After this installation process of Wireshark will complete click on the Next button.

Step 19: Click on Finish after the installation process of Wireshark is complete.

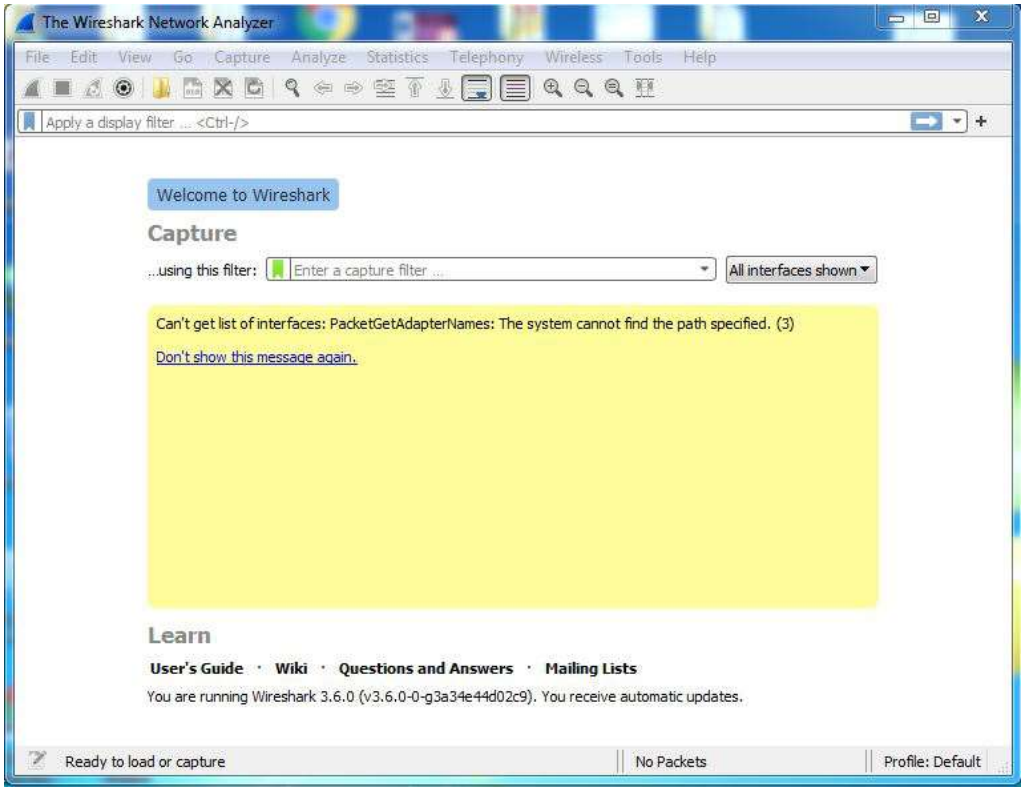

COMPUTER NETWORK LAB

Wireshark is successfully installed on the system and an icon is created on the desktop as shown below:

Now run the software and see the interface.

Congratulations!! At this point, you have successfully installed Wireshark on your windows system.
